

# CROSSFIELD CHRONICLE

VOL. XXIII. No. 37

CROSSFIELD, ALBERTA, OCTOBER 9th, 1930

PRICE 1.50 A YEAR

## Household Threshing SUPPLIES

You will need extra table and kitchen equipment for the threshing time. We have plain cups and saucers, plates, bowls, knives and forks, tumblers, at very low prices and can supply all your needs.

We also have the cheapest line of enamelware that we have ever shown, ranging in prices from ten cents to one dollar and twenty-five cents.

May we show you these lines.

### Wm. Laut

The Pioneer Merchant

Crossfield, Alta.

## Why Worry About Winter Driving when we can make it a pleasure.

We can make your car EASY to start and safe to drive this winter. Come in and let us fix you up NOW, before you freeze your car.

Service on all makes of cars,  
trucks and tractors.

Wrecking and Towing Service.

## CROSSFIELD GARAGE

F. T. BAKER, Proprietor

Agents for:

British American Gasoline, Kerosene, Oils and Greases.

Phone 4

Crossfield, Alberta.

## COAL!

GALT WILDFIRE  
CARBON

The best coals procurable and at prices to suit every need. See us regarding your winter's requirements. We also have some nice dry WOOD for chilly mornings.

Atlas Lumber Co., Ltd.

## GIRL OF FIFTEEN COMMITTS SUICIDE

A very sad case of suicide took place at the Hay's farm, near Carstairs on Saturday, Oct. 4, when Violet Millington, a young girl of fifteen years, took her life by drinking carbolic acid. Before taking her life she wrote a very pathetic letter to her mother, which in part reads as follows:

Dear Mom

Oh gosh! I just cant stand it any longer. I keep thinking both day and night about Dad and you being apart from each other. It hurts me to think that you have raised all us kids, and you are getting old, and to live a life like this.

The last wish on my lips is that this death will bring you together again.

Please put one bunch of flowers in my coffin.

VIE.

Outside of the little family difference she mentioned, which no doubt in time would of straightened out itself, there was no reason for her rash act. There is no doubt but the child worried, which undoubtedly unbalanced her mind temporarily.

It was also found that the child, (like most children) was fond of reading the brand of detective stories that appear in magazines today, as she had spoken of a story she had read, in which a girl had committed suicide by taking carbolic acid.

Mr. Hays for whom Miss Millington had been working spoke of the girl as being a good worker and of excellent character.

The case was investigated by Constable J. S. Jarman and Dr. J. Lester Clarke, coroner of District.

## C. G. I. T. Officers Appointed

On Thursday evening, Oct. 2, a business meeting of the C. G. I. T. was held at the home of Mrs. McCool. The following officers were appointed for the coming year:

President, Marjorie Young; Vice Pres., Mable Gordon; Sec., Eva Jarman; Treasurer, Francis McPadyen; Reporter, Irene Longman; Pianist, Marjorie Young; Song Leader, Mable Gordon.

The next meeting will be held on Oct 16th at the residence of D. H. McFaylen.

## W. I. Meeting

A most interesting meeting of the W. I. was held at the home of Mrs. McCool, Thursday, Sept. 25 at 3.30 p.m., when Mrs. Bury of Olds, addressed the women present on the subject of Life Insurance. The most important points of the address was perhaps this one—Life Insurance is one form of saving that can not be lost in the Stock Market, etc. Mrs. O'Neil gave two much appreciated piano solos.

The next meeting will be held at the home of Mrs. Gazeley and will be a purely social one to which strangers in the town and district are especially invited.

The women are planning a good time.

A Judge in the United States ruled that a man was not a business man who did not have printed stationery.

There are business men in Crossfield who the devil himself could not sell them printed stationery or anything else that meant progress.

## BIRTHS

BORN—To Mr. and Mrs. R. Scheidel, on October 4, a son.  
BORN—To Mr. and Mrs. A. E. Tidball on Oct. 4, a son.

## United Church 25th. Anniversary Services

October 12th. and 19th.

On Sunday, October 19th, Rev. J. N. Brunton of Vulcan will be the preacher at special anniversary services in the United Church Crossfield at 11.00 a. m. and 7.30 p. m. He will also take the service at Inverlea at 3.30 p. m. Rev. H. Young will preach at Beaver Dam at 11.30 a. m.

On Sunday, October 19th, the Rev. R. W. Dalgleish, of Claresholm will preach at Crossfield at the morning and evening services and at Rodney at 3.30 in the afternoon.

Special music by the choir.

## Anniversary Social

On Wednesday, October 15th, a special anniversary social will be held in the Masonic Hall at 7.45 p. m. Special speakers have been secured for this occasion, and a good musical programme, followed by refreshments.

## Philadelphia Athletics Win Baseball Title

PHILADELPHIA, Oct. 8.—Behind the wonderful pitching of George Earnshaw, Connie Mack's Philadelphia Athletics today won their second successive world's baseball championship, crushing St. Louis Cardinals 7 to 1 in the sixth game. It gave the Athletics the series four games to two.

## HOW ABOUT THE FIRE BRIGADE?

The writer was sauntering around town recently looking for news to publish in this great family journal, and finding nothing of note on Railway Street, made a turn up Osler Street and walked into the Town Clerk's office.

Fortunately I found him with a few leisure moments and discussing matters of interest to the town in general, we came around to fire protection which proved a very interesting subject with winter coming on (and having heard that Crossfield is subject to having its fire apparatus called out every once in a while.) Mr. McRory stated that some years ago a good volunteer fire brigade was formed here and to prove his argument he brought out a book of interest containing the names of the officers and members of the brigade, also rules and regulations covering same.

Now, why not call a meeting of the citizens of the town and re-organize a Fire Brigade. We have plenty of material and a good volunteer brigade is as essential to the country town as a paid fire department in the large cities.

## Ratepayers Want News of Municipal Meetings

I have been asked on different occasion lately by ratepayers of the Municipal District of Rosebud, why is it that I do not print the minutes of the council meetings of this district.

I am willing to give a full report of every council meeting in the Chronicle under certain conditions. I would suggest that those desirous of having the minutes of the council meetings appear in the paper to get in touch with the Councillor in their division and put your suggestion before him.

Adam Cruickshank went out shooting on Wednesday afternoon and bagged 15 Hungarian partridges. You have got to be able to shoot to knock these 'go-devils' down.

### What Is Right With Canada?

A moderate optimist, we are told, is one who sees both the good and the bad, the pleasing and the displeasing, the bright and the dark, the encouraging and the discouraging, but prefers to think and talk about the brighter and better things.

At the present time we have more than a sufficiency of pessimists, crappe-hangers, disseminators of blue ruin gossip. We also have a few incorrigible optimists who shut their eyes and ears to the actual facts of any situation and cry "All is well!"

What Canada and the world needs today are more moderate optimists, men and women who, looking at both sides of the picture, refuse to be depressed by the darker colors and shadows and find encouragement and great promise in the brighter colors and the rays of sunshine breaking through the clouds.

Major Yeats-Brown, an Englishman, is the type of moderate optimist whose number should be multiplied. As an offset to the many things that have been said in answer to the query: "What is Right with England?" he advances the question: "What is Right with England?" and proceeds to answer his own question most entertainingly in the London Spectator.

Would it not be advisable for us in this country to also reverse the usual question we hear so often asked these days, and, rather, make answer to the query: "What is Right with Canada?" We may well do so, because there are so many things that are right with this Dominion, so many more right things than there are wrong things, that we are doubly foolish to ignore them and dwell upon the smaller ills.

Looking around Canada we can discover a multitude of good things, the very best things. We find, for example, one of the most healthy, robust people in the world, possessing an abounding vitality and charged with initiative and energy. And of all the blessings which can be bestowed upon a nation or individual, what other one blessing, or group of blessings, surpasses that of health? Possessing health all things are possible; lacking it all the wealth of the world is valueless to bring joy and happiness into one's life.

Looking at other countries, we find many of them filled with hatreds, with strife uppermost in the minds of the people, their thoughts and energies devoted to preparation for possible warfare. In Canada, on the other hand, we have a land occupied by a peace-loving people with positive and growing hatred of war, making no preparations for war, but devoting their thoughts and energies to the arts and advancements of peace. No other country in the world is so "right" on the subject of peace and disarmament as is Canada.

Grouped with health and a sane viewpoint of man's relations to man we can place the moral and intellectual outlook of a nation. Looking over our broad Dominion we find a deep-rooted moral fibre, strong and sturdier than in most lands, with an abiding respect for law and order which no other country can excel, and which far surpasses that entertained by the people of any other country in either North or South America. We find Canada a land of schools and universities, a land in the very front rank of all movements for social betterment, a land the very foundations of which are sound, strong and stable.

Generally speaking, too, Canadian institutions of all kinds, whatever their faults, are strong and sound, constituting a bulwark in defence of the people. A bank failure in Canada is a rare thing; our railways are progressive and efficient, fitting their programmes well into the life and needs of the Dominion. We are not—and never can be—immune from the vicissitudes and effects of world conditions and happenings, but, even so, we have it within ourselves, in our institutions and resources, to withstand the evil effects of world matters beyond our own direct control, and to rally from those bad effects more rapidly than any other land. At the present time, Canada, notwithstanding its difficulties and business depression, is infinitely better off and stronger than most countries, and is suffering from less unemployment, proportionate to its population, than the United States.

Let us, therefore, dwell a little more on "What is Right?" and the effect of doing so will unquestionably be to lessen interest in the more depressing question "What is Wrong?" Isn't the search for right things most likely to expand and thus diminish keenness in the search for wrong things? And isn't it just possible that the volume of right things will grow and be properly recognized until presently the wrong things are forgotten, or at most given their proper relative place in the general scheme? Let us join the quest of the moderate optimist.

#### Western Orchards

G. F. Chipman, editor of the Country Guide, predicts that the near future will see orchards of standard eating apples in all parts of the Prairies where wheat is now grown successfully.

Darrell: "Gee, I'm in an awful hole!"  
Bill: "What's the matter?"  
Darrell: "I spelled 'professor' with two 'f's and don't know which one to cross out."

An investigation of the average life-span of household furnishings shows that a rug lasts nine years, a living room chair usually survives 12 years, and a dining room table 15.

#### Ontario Gold Production

Gold production in the province of Ontario for the first eight months of this year is valued at \$23,277,735, an increase of over \$1,200,000 in value compared with corresponding period in 1929.

Lawyer: "I must know the whole truth before I can successfully defend you. Have you told me every thing?"

Prisoner: "Except where I hid the money. I want that for myself."

Bookseller—Do you want a book of fiction, or a serious work?

Madam—I really don't care. But it must be bound in art-green, so that it will match the wallpaper.

#### IRISH POET IN NEW YORK

George Russell, Irish poet, essayist and economist, has arrived in New York with what he believes is a system of agricultural co-operation that will bring economic relief to the farmer. The distinguished visitor, who is well known under the pen name of "AE," plans to visit every state in the union during his six months' visit.

#### To Study Canadian Methods

Seed Potatoes From Maritime Males Hit With American Growers

The humble spud, which is produced in such quantities in the maritime provinces, has become almost a trade mark of Canada in some American markets, and it rose to real eminence during a visit of 160 members of the Pennsylvania Potato Growers' Association to New Brunswick and Prince Edward Island. These two areas produce the finest seed potatoes on the continent, and the purpose of the visit by the delegation was to study the method under which these superior spuds are raised. The provincial departments of agriculture feted the visitors and showed them all that was to be seen.

#### CONSTIPATED CHILDREN

Constipation is one of the most common ailments of childhood and the child suffering from it positively cannot thrive. To keep the little one well the bowels must be kept regular and the stomach sweet. To do this nothing can equal Baby's Own Tablets. They are a mild but thorough laxative; are non-habit-forming and can be given to the newborn babe with perfect safety. Thousands of mothers use this medicine for their little ones but Baby's Own Tablets. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

#### A Refreshing Treat

Church Supper Gives People Opportunity For Sociability

The season for the church supper and the festival is here. These delightful events crowd the late summer and early autumn evenings. In this day and generation of so-called high-speed existence when we seem to depend so largely on manufactured enjoyment it is indeed a refreshing treat to attend the rural church supper or festival. At these events there is to be found wholesomeness and a plenty of food and association for greater values than the price paid for the ticket. These affairs are conducted for profit of course, but is a broader profit than monetary gain alone.

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be got if the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system, and afterwards the child's rest will be undisturbed. The powders cannot injure the most delicate baby, and there is nothing so effective for restoring the health of a worm-worm infant.

#### Only a Memory

American Farmer Sees His Holdings Diminute Under Successive Administrations

Senator Thaddeus E. Caraway, of Arkansas, in a speech before the state Democratic convention, described himself as an "ex-farmer."

"When Woodrow Wilson was president I owned a farm," he said. "After Harding was in office, I had only an equity. Then came Coolidge and all that was left of my farm was an echo. Now that we have an era of Hoover prosperity, my farm holdings consist of a memory."

Temperature tests made in the region of a forest show: "at the draft and heat from two flames caused a difference of ten degrees in temperature at some distance ahead of the advancing fire."

Minard's Liniment aids tired feet.

W. N. U. 1858

#### Impatient For Disarmament

League Of Nations Is Called Upon To Take Quick Action

A vehement and sometimes impatient demonstration, urging the hastening of the League of Nations' disarmament programme and early disarmament by the war in the demand for reduction and limitation of armaments, was witnessed in the League assembly's disarmament committee at Geneva recently.

From this rally there arose a promise of J. J. London, chairman of the preparatory disarmament commission, that the commission would meet November 3 and fervidly seek to finish its task of clearing the way completely for a congress of all nations to construct a scheme of general disarmament. Voices from countries that were neutral during the World War, joined those from states which were disarmed by the war in the demand that the League should get along quickly with its long delayed purpose of inducing nations to lay aside their fighting.

#### German Property Sequestered

Conversations Between Officials Of Canadian and German Governments To Be Held

German property seized in Canada during the war will be the subject of conversations between officials of the German government and Hon. C. H. Cahan, secretary of state. Accompanied by Thomas Mulvey, under-secretary of state, Mr. Cahan will sail from New York. Discussions will take place in Berlin.

Of the large amount of property of German nationals sequestered by the Canadian government during the war, some \$600,000 remains unliquidated. In January, Canada agreed that the unliquidated property consists chiefly of land and securities that it has been found difficult to market. There still will remain in the hands of the Dominion government more than enough to settle all claims by Canadian civilians for reparations as a result of enemy action in war-time.

#### Fire Kept Burning

Century and Half North Carolina Family Has Not Let It Go Out

Along about the time the Declaration of Independence was being signed a stalwart son of Saxony came to the mountains of Saluda, N.C., to build a cabin for his family. A fire kindled on the newly-finished hearth has never gone out.

William Morris, who doesn't know how old he is, lives alone in the warped log hut, and tends the fire his grandfather started more than 150 years ago. He is the last man of his family.

An Oil Without Alcohol.—Some oils and many medicines have alcohol as an essential ingredient. A judicious mingling of six essential oils composed Dr. Thomas' Electric Oil, and there is no alcohol in it, so that its effects are lasting.

#### An Artist Without Arms

Henry Wiegman, a student artist of Cicero, a suburb of Chicago, was born without arms. But he is one of the promising students of an art school here. Wiegman holds the brush between his teeth and manipulates it with his tongue. He intends to make his living by commercial illustration or in his own gift shop. His ambition to paint dates from the time he learned to write by the same method. He is twenty-three now.

Athletes recommend Minard's Liniment.

#### Conjuring Creek

Conjuring Creek, the curious name of a northern Saskatchewan river, was first suggested by that of Wier and Lake from which it flows. The Cree name is "Pawgonow."

Britania is to have a library of historic naval photographs.

Singing is a most valuable exercise for the lungs.

#### English Being Taught In German Schools

Classes Are Popular and Students Show Great Interest

Every boy and girl in Germany is being taught English, according to Prof. Max Zimpfle, author of English and German textbooks, who was in New York recently.

"Our students are tremendously interested in anything about America," he explained. "Every language teacher reports that the classes teaching English are very popular. We teach the same pronunciation heard in the South of England."

The school system in Germany is quite different to the United States, the visiting professor says. Over there the aim is to have an aristocracy of learning. They do not desire to have every boy and girl graduate, but rather to make the work so difficult that only the brightest pupils can finish their high school course. Children who are backward in school are given a sound elementary training and then the government apprentices them to a good trade for four years.

Socialist—After all, what is the difference between the rich man and the poor man?

Bystander—The rich man has acute laryngitis and the poor man has a cold.

We read of a man who pushed a collector of income tax out of a third-floor window. It is not thought he meant any harm. —Punch.

An efficacious household remedy—Dough's Egyptian Liniment Brings immediate relief to lame back and muscular rheumatism. Also relieves inflammation, burns, sores, corns and warts.

Tommy (arriving at the country cottage) — Where's the bathroom, mother?

Mother—There's no bathroom here, Tommy!

Tommy—Good. We're going to have a real holiday, then.

## Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antidote for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes

sweet, the pain departs. You are happy again in five minutes. Don't depend on crude methods. Employ the best way yet evolved in all the years of mankind. That is Phillips' Milk of Magnesia. Be sure to get the genuine Phillips' Milk of Magnesia prepared by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

# Livestock Is Shown To Be A Prime Factor In Economic Development Of The West

A popular idea is that revenue in the Canadian prairie provinces is derived almost wholly from grain. A second idea is that the growth of home-steading vastly increased grain production at the expense of livestock and cut down drastically the number of head of livestock between the Great Lakes and the Rocky Mountains. Both ideas need considerable revision.

The rapid settlement of the Prairie Provinces made possible by grain growing has been accompanied by an increase in livestock that has more than compensated for the reduction in ranches, so far as numbers are concerned. Self-sustaining farming demands the raising of livestock, and the change in the West in this respect within the past decade or so has been remarkable. Today, though the livestock industry in Manitoba, Saskatchewan, and Alberta has only touched the edge of possibilities, the number of head of cattle, sheep, and swine on farms is an important percentage of the whole in the Dominion. The fact has great value economically, for it tends to spread agricultural wealth more evenly over the seasons than is possible with grain farming only.

The four western provinces have now more than three times as many cattle, more than four times as many sheep and nearly eight times as many swine as there were in the most palmy range day. Comparative figures for the year 1901, when complete records were first gathered, and 1929, are as follows:

Year	Cattle	Sheep	Swine
1901	1,066,627	215,996	241,794
1929	3,554,040	1,114,143	1,728,608

It is interesting to examine the figures representing the livestock production of Western Canada for the last eight years. In arriving at the figure it is difficult to gauge the number of head of livestock slaughtered on farms for home use and by local butchers and at small, unreported killing plants. The Dominion Bureau of Statistics finds that in the case of cattle inspected, slaughtering runs about fifty per cent. of the yearly estimated total in Canada, but about forty per cent., and sheep about forty per cent. By making the necessary adjustments, therefore, on the inspected slaughtering in the Western provinces a fairly close estimate of the local or unreported killings may be made.

Total figures representing some seven and one-third million cattle, over eighteen million hogs and about two and three-quarter million sheep look to the credit of Western Canada at first glance. When it is found by further figuring that for the same period 15,398,097 cattle, 47,481,005 hogs and 10,906,429 sheep and lambs are the estimated total killings in the whole Dominion of Canada, a slightly different aspect of the picture is presented. Continuing with the comparison it is seen that Western Canada produced roughly 48 per cent of the total cattle, 38 per cent of the swine and about 25 per cent of the sheep and lambs.

Is this a fair share of the total, or could Western Canada, everything considered, have been expected to produce a greater percentage of the total? If only livestock production is considered in terms of acres of land under cultivation and the number of cattle production one might form the opinion that the West should be marketing two-thirds or three-quarters of the Canadian total, but when the hundreds of millions of bushels of grain that Western Canada ships annually are considered the conclusion is reached that while there is room for great ultimate expansion of the cattle industry there, the West is possibly for the moment carrying a fair share.

Swine production figures, however, are not so easily disposed of in that manner. The fact that so much

grain is being produced on the prairie would lead one to believe that the West should be the source of the heaviest hog shipments in the Dominion, for swine production goes hand in hand with grain production. It is an axiom that nowhere can hogs be produced more cheaply than at the fountain head of the grain supplies. Yet Eastern Canada, with very small grain fields, although having a certain advantage in the matter of dairy by-products, turns out nearly two hogs for every one that comes from the West.

The following table, showing number of bushels of wheat and all other potential feed grains produced for every hog carried in the various provinces respectively, indicates that hog production in the older provinces has become more or less stabilized in relation to their grain supplies, but it also points out the possibilities open to swine men of the West.

Ratio of Bushels of Grain Per Hog	Province	1911-15	1916-20	1921-25	1926-28
Manitoba	107	118	121	131	102
Quebec	70	81	85	72	
Ontario	109	110	110	100	
British Columbia	104	90	105	121	
Manitoba	680	498	469	304	
Saskatchewan					
Alberta	650	571	654	694	
Alberta	394	281	230	324	

With such low hog production in relation to grain supplies it would appear that not only is there plenty of grain available to increase hog production in the East but great advantages in swine marketing might reasonably be expected in the not distant future from Saskatchewan, Manitoba and Alberta. The difficulties attending the marketing of the immense quantities of low grade wheat and feed grains of the 1929 crop, and the apparently more serious ones consequent on the moving of the short high grade wheat crop of 1929, as also the feed grain crop, should command to far-seeing Western farmers the idea of turning out more of these feeds at the greater relative returns obtainable through cattle and sheep.

Some agitation was caused by the fact that last year Canada's net imports of lamb and mutton were over three and three-quarter million pounds. Yet the per capita consumption of lamb and mutton in this country is only about 6.5 lbs. Does not this point out an opportunity for a substantial increase in production of these meats, first, to meet the present requirements of the country, and second, with a view to making lamb a more important item in the average family menu? Western Canada with only 25 per cent of the present production seems to lag in this respect, as sheep are probably the best livestock to assist in the rehabilitation of run down and dirty grain farms.

Canada should be able at least to feed all her people entirely on Canadian grown livestock products, and should be able to produce them at competitive costs with any other country in the world. We are almost everything necessary to insure success in such competition; the one essential thing lacking at present seems to be a definite program and plan of production.

## The Method In Ireland

People Eloquent To Bricks When Hunters Disturb Them

Tired of the "ceaseless banging" of the guns of game hunters, people living in the vicinity of a lake in Cork, Ireland, restored peace by use of stones, bricks and soda. Since the opening of the hunting season there was a fusillade at dawn and dusk. As the district is not regarded as a public road, fowling who shot birds could not be touched by law. City officials told the protesters that they were powerless and the City Corporation met and gave the same reply. Alderman Daly moved to request the Minister of Justice to issue an order declaring the lake a sanctuary. But the peace-seekers could not wait that long. When the sportsmen next appeared, men, women and children met them with a fusillade of missiles. Sportsmen and dogs beat a hasty retreat, some men dropping their guns as they ran.

## Owned Valuable Coin

After walking around for several months with a \$20 gold piece marked in 1847 in his pocket, Clark La Bessy, of Toledo, decided he'd look up the coin in a catalogue and see how much it was worth. You could have knocked him down with a feather when he read that because of the peculiar thickness of the design it was worth \$3,500.

## NORTH AMERICA'S CHANGING GOLD PRODUCTION

North America is, next to Africa, the chief gold-producing continent, usually contributing about one-quarter of the world's annual gold output. Within the past decade the North American production of the yellow metal has rather more than held its own, but this showing has been due entirely to the fact that Canada's rising output has been sufficient to offset the declines in the United States and Mexico. Ten years ago the total output of the United States was three times as great as that of the Dominion. Today the two countries are almost on a par in that regard.

## Sheepmen's Opportunity

Demand For Mutton and Lamb Is Steadily On the Increase

Reports from some leading sheep producing countries is that a reduction in the flocks is taking place. The Bureau of Agricultural Economics in the United States believes the decrease will continue for the next two or three years. This should suggest to Canadian sheepmen a policy of "staying in." Our total sheep number is insignificant compared with the estimated total of about 700 million for the whole world. Still more to the point, it is actually too small for a country of ten million population in which the demand for lamb and mutton is steadily going up. The per capita consumption of these meats is still a long way from being equal to that of some other countries and the indications are for a steadily growing demand for good quality Canadian lambs for a long period.

In the United States the unwieldiness of going out of sheep too strongly is hinted at by the Bureau when it states: "The individual producer is advised to consider carefully his feed supplies and the long-range outlook for the sheep industry, in making his plans for next year. Where feed supplies are available he may find that present conditions offer a good opportunity for improving the quality of his breeding flock."

## Predicts Growth Of Dairying

Manitoba Dairy Commission Notes Steady Increase Of Industry In The West

L. A. Gibson, dairy commissioner for Manitoba, states that he never saw a better show of butter than that exhibited by Manitoba at the Toronto Exhibition. He noted a steady growth of interest in the dairy industry of the West, and pointed out that in Manitoba sales of the better, cheese, cream, milk and other dairy products amounted now to \$15,000,000 a year. He believed that the next few years would witness an even greater growth in dairy production.

## World's Grain Show

Many Countries Have Signified Their Intention Of Being Represented

Belgium has officially accepted the invitation to take part in the World's Grain Exhibition and Conference at Antwerp, from July 25th to August 6th, 1932. Some little time ago official invitations were sent from the Dominion Government to all countries inviting them to participate in the exhibition. These have already signified their desire to do so. They include Peru, Yugoslavia, Guatemala, New Zealand, Poland, Czechoslovakia, The Netherlands and Belgium.

The first sandwich from an ornate roasted by 5,000 people at a recent charity event at Coalpit Heath, England, was sold for \$22.75.

## New Variety Of Barley

Is Practically Barrenless and Gives Good Yield Per Acre

There should be more barley grown on Canadian farms, especially dairy farms. Tests made in several provinces have shown again and again that barley, on the average, produces more pounds of feed per acre than does oats and that the feed is worth more per pound. And yet the crop is not commonly grown. The reason is not far to seek. Few people care to wage war with barley weeds. They would rather take the smaller returns per acre from oats than undergo the discomfort of threshing barley and handling the straw through the winter. This battle with barley weeds, however, is no longer an argument against barley.

Several stations announce new varieties of barley that are either barrenless or have short awns. One of the new barleys, developed in Iowa and called "Velvet," was tested against the O.A.C. No. 21, the most popular variety in Canada. The new smooth awned variety gave an average yield of 39.37 bushels per acre as compared with 35.17 for the Ontario variety. When it is considered that barley fits as well into the cropping system as does oats and that it is a better nurse crop for grasses and clovers the argument for a larger use of the crop would seem to be complete.

## Reclamation Scheme

Proposed To Reclaim 700,000 Acres In Carrot River District

Formation of an organization similar to the On-to-the-Bay Association to advance the proposed reclamation scheme for the Carrot River triangle was urged by H. F. Bickle, prominent northerner, in an address before the local Rotary Club at The Pas. Quoting Federal Government and other reports, Mr. Bickle outlined the various schemes proposed to turn the triangle into a great farming country. The triangle lies southwest of The Pas and most of its area is in Saskatchewan. It consists of about 1,000 square miles, or approximately 700,000 acres. Mr. Bickle pointed out that Premier Anderson, of Saskatchewan, had promised to give the matter consideration after that province had assumed control of its natural resources. However, he asserted, an active association is needed in northern Manitoba to keep the project alive.

Manager: "You're late today, Miss Brown."

Typist: "Yes, sir; I fell downstairs."

Manager: "Well, that didn't take long, did it?"

Certain kinds of water plants are deadly foes of breeding mosquitoes, and one species of waterweed, the bladderwort, actually swallows and digests the wigglers.

# Veteran Canadian Explorer Returns To Atlantic With Relics Of Franklin Expedition

Satisfied that all the information which it is humanly possible to discover regarding the fate of the Sir John Franklin party, which perished among the Arctic islands off the mainland of Canada 53 years ago, has been gleaned, Major L. T. Burwash, veteran explorer, returned to Ottawa with a number of relics.

Their discovery in an abandoned camp on King William Island, between Victory Point and Lady Jane Franklin Point, added little to what was already known, beyond definitely establishing the locale of at least one staying place in the long trek which appears to have ended hundreds of miles south, on the Canadian mainland, near the mouth of Back's Fish River.

The fragment of a canvas tent, circular in shape, and lending color to the assumption that this portion had been frozen to the ground while those occupying it had torn away the remainder, pieces of naval broadcloth, some inch-thick rope, and the rusted blade of a knife constituted Major Burwash's find. He encountered two graves on King William Island, but from these nothing could be gathered. Of the grave of Sir John Franklin himself, no trace was found.

In spite of the 80-odd years that have elapsed since the two ships, "Erebus" and "Terror," set out in an attempt to discover the North West Passage, a certain fascination continues to surround the fate of their crews. For 70 years a veil of silence has shrouded them and only one small scrap of paper has ever been discovered relating to the expedition. This was the report and message found on King William Island by the search expedition of Captain McClintock in 1857. The message, signed by Sir John Franklin, announced how the two ships had wintered at Beechey Island in 1846, and that all was well. But marginal notes on the paper written by another hand at a later date, conveyed the information that Sir John Franklin had died in June 1847. The notes gave the strength of the party as 105, and they proclaimed the intention to essay an overland journey from King William Island to the Canadian mainland at Back's Fish River.

## Raise More Geese

Good Returns Obtained On A Very Small Investment

Geese raising does not receive the attention by the farming community that the business warrants, assert poultry experts of the Dominion Department of Agriculture. The farm is the natural habitat of the goose, providing those two great essentials to successful geese raising — free range and an abundance of green foods. Raising a flock of geese is one means by which the farmer can reap a good reward with a very small investment and comparatively little labour. Geese command a good price on the Christmas market and the demand is always greater than the supply.

## Finds Five Daughters Expensive

Pleading guilty before the city magistrate of Mysore, India, to the theft of jewels from the Prasanna Krishnaswami Temple, the high priest testified that his salary was only \$7.85 a month. He added that he had been "cursed" with five daughters, and as their husbands were not able to keep them, he was compelled to maintain their families as well as his own.

Somebody has been asking, "What becomes of pins and needles?" The answer is that they disappear after a brisk rubbing of the affected part.

That this trek was attempted is clear from Eskimo tradition. In 1850, Dr. John Rae of the Hudson's Bay Company, surveying the coastline in that neighborhood, encountered natives who were then using harpoons and other utensils which bore the mark of the Franklin expedition. They informed him that years before a group of white men had been seen straggling across the ice to the mainland, "singing as they walked." Verification of the Eskimo tradition was secured at Starvation Cove, where later expeditions located about 40 graves.

The purpose of Major Burwash's flight to King William Island was, in part, to verify, if possible, the story of an American mining engineer, named Jemmo, who, many years ago, originated a report concerning the Franklin party which, if correct, have thrown new light on their fate. This story, in document form, was bought by the Department of the Interior, from T. W. Jackson, of Vancouver, B.C. In his report to the minister, Major Burwash definitely establishes that the Jemmo story is without foundation.

With two companions, Pilot Gilbert, of the Western Canadian Airways, and Richard Flinn, of the Department of the Interior, Major Burwash flew from Bernard Harbor, northwest of the mouth of the Copernicus River, to Boothia Peninsula — the magnetic pole — and thence to King William Island. Landing in a fresh water lake some distance inland, he prosecuted his search between Victory Point and Lady Jane Franklin Point. Having made his discovery, he returned by air to Copernicus, thence south to Great Slave Lake, Fort Smith, and McMurtry, Alberta.

Over 2,000 photographs were taken by Mr. Flinn during the flight. These will be of great value to topographers in correcting many inaccuracies regarding the coastline of the mainland and the islands over which the party flew. Matty Island, for example, near where it is believed one of the Franklin ships sank, is not an island, but an archipelago comprising hundreds of islands. Other discrepancies were noted.

## International Boundary

Important Work In Connection With Demarcation Of 5,000 Miles Of Border

In carrying out its duties of maintaining in a state of effective demarcation the 5,000 miles of international boundary between Canada and the United States, in accordance with the provisions of the Treaty of 1925, the International Boundary Commission, the Canadian section of which functions under the Survey Bureau of the Department of the Interior, has this year a number of important operations on hand. These include reopening the vista and repairing the monuments on some fifty miles of the highlands boundary between Quebec and Maine, making surveys for the revision of certain of the boundary maps between British Columbia and the state of Washington, and erecting monuments at the point where an important international highway between Kelowna, B.C., and Portland, Oregon, crosses the border. It is also intended to locate and mark the boundary in the new Detroit-Windsor tunnel before it is officially open for traffic.

## Out Of Luck

The husband came home and was greeted at the front door by his wife. "Did you get the new maid?" he asked.

"No, I'm afraid not, dear," she answered.

"Weren't there any at the registry office?" he went on angrily.

"Yes, darling, but we've had them all before," was the rejoinder.

Cowardly Suicide: "Help! Police! I am killing myself." — Buen Humor, Madrid.

Photograph taken during the recent German manoeuvres shows the "Hessan" firing a broadside. The manoeuvres are at Kiel Bight.

"Look pleasant, please." — Lustige Scherz, Leipzig.

W. M. U. 1929

## INDIGESTION

### Banished by Kruschen

"I suffered for some years from a bad stomach, and used to feel very miserable after meals. The doctor advised me to take Epsom Salts, but it did me no good. I decided to try Kruschen and am now taking it, and have done for the past 12 months, and I am very glad to tell you that my stomach is now in perfect order. I feel as young in spirit as I was 20 years ago, thanks to Kruschen." (W.B.)

You know how badly an engine runs when it gets clogged up. It's the same with your body when your gastric—or digestive—juices fail to flow. What you need is a tonic—Nature's own tonic—Nature's six mineral salts.

You get all these six salts in Kruschen. The first effect of these salts is to promote the flow of the saliva and to awaken the appetite. The next action occurs in the stomach, where the digestive juices are encouraged to pour out and set upon the food. Again, in the intestinal tract, certain of these salts stimulate a further flow of these vital juices which deal with partly digested food and prepare it finally for absorption into the system.

## WORLD HAPPENINGS BRIEFLY TOLD

Bound for Germany to negotiate a settlement for accounts outstanding between that country and Canada, Hon. C. H. Cohen, Secretary of State, sailed recently from New York.

The London Daily Herald reported that King George recently wished to confer a title upon George Bernard Shaw in recognition of his literary eminence, but that Shaw had declined.

Prince Leopold, of Bavaria, field marshal of Germany and commander of the German army in the east during the earlier stages of the war, is dead. He was 84 years old. Death was caused by pneumonia.

The first woman accountant in the province of Quebec was received into the membership of the Society of Chartered Accountants, when Miss Charlotte N. Howell was presented with her entrance certificate.

Crime in Great Britain has deteriorated so much that prisons are operated far below capacity and several have actually closed for lack of occupants, states Sir Higgins, medical officer of the prison in Liverpool.

Order-in-council granting a loan of \$50,000 to the Manitoba Cattle Loan Association was passed by Manitoba's cabinet council. The association secured the money at five per cent. and will charge members seven per cent. for advances secured by lien notes on cattle purchased.

The parliament of New Zealand has approved a scheme to establish a national art museum to include a war memorial and a carillon. The citizens of Wellington have subscribed \$500,000, and the government has granted a subsidy of the same amount.

Frederick Edlin Smith, the first Earl of Birkenhead, statesman, 58 years old, died in London, England, Sept. 30, following a lengthy bronchial ailment. He was state one time British Lord High Chancellor and Secretary of State for India. During the war he prosecuted Sir Roger Casement, Irish leader, who was hanged for his wartime activities.

### Shipbuilding in Sweden

Sweden maintains lead in industry among Scandinavian countries. Sweden maintains its lead in the shipbuilding industry among the Scandinavian countries, according to the latest reports. At the Swedish yards 26 vessels with an aggregate tonnage of 127,000 gross tons were in the course of construction at the end of the first half-year. Denmark comes second with 29 ships of 116,000 gross tons and Norway third with 33 ships of 40,000 gross tons. Of the ships at present being built in Sweden nine are steamers, two motorships, 2,000 gross tons each, two motorships of 2,000 to 4,000 tons, four motorships of 5,000 to 6,000 tons, and six motorships of 8,000 to 10,000 tons.

Jimmy (watching something tasty going into sickroom)—Please ma, can I have the measles when Wilma's done with them?

Ointment 50c. Medicinal Soap 25c.

### Shortest Name For Horse

Racer in England Answers To Name Of "O"

There's a race horse in England named "O." This establishes a practically unassailable record for brevity. One suspects that its owner, Mrs. G. L. Redmond, an American, saw an opportunity to attract a little attention by thus naming the nag, although with so many horses running around these days owners have just about run out of names.

In the United States, there is a rule that a period of 15 years must elapse before a name once used by a race horse can be used again. Over in England the only restrictions are that you cannot name your horse after the winner of one of the "classics" nor for a living person without obtaining permission.

The "classics" are five in number, although the term is frequently abused, the Thousand and Two Thousand Guineas, the Derby, Oaks and St. Leger. Horses winning these races retain their individual names in perpetuity.

### Winnipeg Newspaper Union

(By Eva A. Tingey)

DELIGHTFUL WEAR

All Tingey models are created and sketched in Paris and the patterns are made in New York.

If small daughter is wanting some long-sleeved little dresses for the cooler days here is a charming model. If long sleeves are not in demand then this model is equally suitable because the lower sleeve can be omitted and Hey Presto—short sleeves!

Very pretty is this dress carried out as the sketch in a fine kashe weave in chills or some similar thin woolen or wool and cotton. The original in scarlet kashe has yellow and blue blanket stitch (crochet) will do of the edges, sleeve joins, and cross at neck for wee decoration here and there. Owing to its coloring and trim the model assumes a peasant air. It is dainty and charming in its short sleeved form in cottons and washing silks.

This pattern may be obtained in sizes 2 to 6. It is ready for immediate delivery. It is hand cut. Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

### MAJOR L. T. BURWASH

Major L. T. Burwash, noted Canadian explorer, who is back at Ottawa after his epic Arctic flight, during which he mapped the magnetic pole and discovered much to clear up the mystery of the fate of Franklin's expedition.

### SUNDAY SCHOOL LESSON

OCTOBER 12

MARY, THE MOTHER OF JESUS—AN EXAMPLE OF MOTHERHOOD

Golden Text: "Mary kept all these sayings, pondering them in her heart."—Luke 2:19.

Lesson: Luke 2:15-19; John 2:1-5; 19:25-27.

Devotional Reading: Psalm 67.

### Explanations and Comments

The Mother Of The Babe, Luke 2:15-19.—The shepherds were amazed at the message which had come to them, but they were not incredulous, and they said, "Let us now go and see that it be come to pass which the Lord hath made known unto us." Read the whole beautiful story in Luke 2. They went and found the Christ-child in the manger, and his mother Mary, and also Joseph. To Mary and Joseph the shepherds told what they had heard and all marvelled, but Mary retained their words in her heart, pondering them over and over.

The Mother Of The Man, John 2:1-5.—The third day after Jesus' talk with Nathaniel, John 1:47-51, He came to Cana of Galilee, Nathaniel's home town. At a house where Mary was well known, wedding festivities were being held, and when her Son appeared with His followers they were invited to attend. Toward the end of the festivities, which lasted six days, the supply of wine began to give out. Mary saw this, and turned to Jesus for help. "They have no more wine," she told Him. She made no request; she simply told Him of the situation.

The Mother Of The Saviour, John 19:25-27.—Standing by the Cross of Christ were His mother, her sister Salome, Mary the wife of Clopas, and Mary Magdalene. The two phrases, "His mother's sister," and "the wife of Clopas," may be taken to refer to one woman, but in that case the two sisters were both called Mary, which is improbable.

"O the weight of her affliction! Here, who won God's benediction. Here, who bore God's Holy One: O that speechless, ceaseless yearning! O those dim eyes never turning From her wondrous, suffering Son!"

Jesus looked upon His mother and John, "the disciple whom He loved."—John never mentions his own name in His Gospel, and said to His mother, "Woman, behold thy son," and to John, "Behold, thy mother." Dr. F. E. Meyer suggests that Jesus would not call her "mother," lest identification with Himself might expose her to insult.

"In that hour of excruciating agony he did not forget his mother's need. No other person's sorrow was eclipsed by His own. He was never self-centered in His grief, so as to ignore the weakness of others."—J. H. Jovett.

And from that hour John took the mother of Jesus into his own home.

### Conduct Mass On Eiffel Tower

A religious mass was said at the top of the great Eiffel Tower recently, the first time since it was built more than 40 years ago. It took place in the lofty wind-swept little cage 4,000 feet above the earth. A small table was used as an altar and the music which accompanied the liturgy was the breeze. Special tribute was paid to M. Eiffel.

### Made It Balance

The wife had been put on the budget plan. At the end of each month she and her husband would go over the accounts together. Every once in a while he would find an item, "L.O.K.," \$6.

Finally he said, "My dear, what is this—'L. O. K.'?"

"Lord Only Knows," she replied.

Mending clothes is accomplished in the same manner as patching an automobile tire, with a mending paste, which withstands washing, boiling and ironing.

A woman's tongue is her sword, and she never allows it to rust.

W. N. U. 1858

## Tea Biscuits unusually good when made with Magic Baking Powder

If you bake at home send for the New Magic Cook Book. It will suggest many attractive dishes and save time for you.

Look for this mark on every tin. It is a guarantee that Magic Baking Powder does not contain any alum, or any harmful ingredients.

3 out of every 4 Canadian housewives\* who bake at home, use Magic Baking Powder because they find that Magic gives consistently better baking results.

Next time you bake biscuits, try Magic and see for yourself how it will help you with your baking.

### Try This Recipe for Biscuits

8 cups flour  
4 teaspoons Magic Baking Powder  
1 1/2 cups cold sweet milk, more or less  
Method—Sift together flour, magic baking powder and salt, then cut in shortening. Gradually add cold milk sufficient to make a soft dough as can be handled, using a knife to mix with.

Work centre of hand generously, drop dough on tin, pat or roll out very lightly to 1" thickness. Cut out, bake 15 to 20 minutes in hot oven. Biscuits should be cold. Handle as little and as lightly as possible and avoid working in new flour after milk has been added.

\*This fact was revealed in a recent Dominion-wide investigation.

### Huge New Glacier Found

Ice Field in British Columbia May Be Largest In World

Bringing back a story of having discovered an ice field that will outlive any previously known, Christian Haasler and Ernest Feuz, Swiss guides of the Chateau Lake Louise and Banff Springs Hotel, arrived at Golden, B.C., by using train, motor and pack train.

With Major Longstaffe, of Vancouver, the guides reached the headwaters of the South Gate Littlewood and Toba Rivers, 100 miles north of Vancouver, in the Cascade range. The silty state of the rivers convinced the explorers that the streams were glacial fed and so they penetrated the virgin country at the headwaters.

Huge snow fields and glaciers estimated at an area of 350 square miles, were seen and photographed for the first time. Ernest Feuz states that what they saw is only a part of the huge glacial field there.

### Try To Decipher Document

Second, Andree Diary Causing Experts Much Difficulty

Experts examining the documents found with the remains of members of the Andree balloon expedition in icy Hvitevoen are having difficulty with the second of the Andree diaries, which they believe contains the record of the last days of the trio.

It had been exposed during the 33 years since the death of the three men and its contents are well nigh erased by time and the elements.

"If you haven't a doctor," said the tourist at the hamlet inn, "what happens when anyone is taken seriously ill?"

"Oh, they just die a natural death."

### Another Wonder Of Science

New Device Makes Breath A Kind Of Third Hand

As we have ceased to wonder at the marvels of science, it is not surprising to learn that inventors have found new uses for the breath of the human body besides just breathing, or blowing on one's hands when cold, or on a cup of tea when hot—assuming one is not taking tea when "company" is present.

Dr. S. E. Free, New York, consulting engineer and scientist, comes forward with a device which can be attached to many things, and all one has to do is to blow into a sort of telephone mouthpiece, and it will do a job of work. It makes the breath a kind of third hand when a person is busy.

For instance, if you are playing the piano, simply blow into the mouthpiece and it will turn a page of music. If typing, you don't need to lift your hand to shift the carriage, simply blow and the carriage will slip back. Blow again and it will open the door of your auto, or open the window. In a plane your breath may manipulate the controls. In the same way you may operate heavy machinery. In fact, there is almost no limit to the possibilities which a little "blowing" may accomplish. Only this is a purposeful sort of blowing, not mere windbag stuff.

Believe It Or Not Mountain peaks in the Cariboo range are growing taller, according to fur traders at Fairbanks, Alaska. As proof, one trapper points out that he has found trees on mountain sides with high water marks on them from lakes and streams now hundreds of feet below. A government geological party has been asked to investigate the growth of the peaks.

### Saving For The People

Says Saskatchewan May Save Over \$300,000 In Connection With Freight Rates On Canned Goods

"People of Saskatchewan will save over \$300,000 this year on canned goods," states Hon. J. A. Menzies, Minister of Railways and Labor. The figure \$300,000 had been given to the department as the estimate of a large wholesale grocery firm with a warehouse in Regina, he said.

"The estimate will be very close to correct," Mr. Menzies said. The rates in effect would continue until the close of navigation on the great lakes and then the matter "will have to be fought out all over again," he added.

The government had received the support of the boards of trade of Saskatchewan, the Retail Merchants' Association, and the United Farmers of Canada in the fight, which had been won on July 14 and September 16, Mr. Menzies said in conclusion.

"The stalls," we are reminded, "do not applaud so heartily and unreservedly as the pit and gallery." No; they are the reserved seats."

In all Belgium there are only about 12,000 unemployed.

### An Emergency Dressing

Minard's is invaluable as a quick dressing for burns, scalds, and all flesh abrasions. It cleanses and soothes the wound.

## Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

## WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE  
MADE IN ENGLAND SINCE 1911 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNs SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Distributors: JOHN A. CHANTLER & CO., LTD.  
51 Wellington St. W. TORONTO, ONT.

## SAYS CANADA IS NOW EMERGING FROM DEPRESSION

Winnipeg, Man.—Veering toward thrift, viewing her future with stern-faced confidence, Canada already moving out of a depression period, was advised to pay even more attention to business by General Sir Arthur Currie, president of McGill University, and wartime commander of the Canadian expeditionary force overseas. In an address to members of the Winnipeg young men's board of trade, he pronounced himself more proud and more confident of Canada than ever before, after a searching inspection of the west, and he thought the Dominion was on the way to cutting extravagance.

"I know there is too much luxury, too much extravagance," asserted Sir Arthur, "but hard times are curbing that and so out of an evil, a blessing flows. I know we are not thrifty enough, but I believe we are becoming more serious."

Passing, as he is, through a "somewhat uncertain and somewhat anxious time," the Dominion is without any sign of wailing, Sir Arthur observed. "We no longer hear whispers of death, no longer hear of the secession of the Maritime provinces, no longer hear that the Prairie provinces will pass to the United States, no longer hear that we are passing rapidly to our doom."

He added: "It is glad that this is so. I can't bear to hear so many announcements or despatches that we are an enervated or a played-out race."

Sir Arthur spoke enthusiastically of the Peace River country. "The great kingdom of the Peace," he termed the extensive Alberta agricultural area.

### For the Blind

Free Radio Licenses Issued By Government To Blind Radio Owners.—Ottawa, Ont.—Radio licenses issued free by the Canadian Government to blind radio owners totalled 624 for the period of the fiscal year 1929-30 to date, compared with 589 for the entire fiscal year 1929-30, according to official figures, issued recently.

The total number of radio licenses issued for the first five months of the current fiscal year was 349,676, which also indicates a steady increase in the number of radios operated in the Dominion.

### Find White Seals

American Expedition Discovers Specimen Of Mexican Coat

San Diego, Cal.—The existence of white seals, heretofore regarded as mythical, was reported here by the San Diego Zoological Society's expedition after its return from Guadalupe Island, off the Mexican Coast.

Members of the party reported that white seals had been found on the inaccessible rocks of an outer islet where landing was impossible. They were unable to obtain a specimen.

### Vancouver Wheat Exports

Shipments To Date Double the Amount Of Record Year

Vancouver, B.C.—Wheat exported from Vancouver during the current crop year to date totalled 8,283,378 bushels, double the amount shipped out during the same period of the record crop year of 1928-29 through Vancouver, when total shipments reached 100,000,000 bushels. Last year at this time only 2,679,378 bushels had been shipped.

### Cattle Exports To Britain

Montreal, Que.—Canada's cattle export trade to Great Britain amounted to 1,660 head through the port of Montreal to date this year, with the recent shipment of 377 head which was the sixth shipment for the season. No cattle were sent to Great Britain last year.

### Japan Taking Census

Tokyo, Japan.—Japan is taking stock of her manpower. A quarter million census takers have begun collecting data in the empire's second decennial census. Preliminary estimates stated the census would show the population of the whole empire at about 60,000,000.

### R-101 Makes Trial Trip

Cardington, Eng.—The reconditioned dirigible R-101, which is the largest airship in the world since it recently was lengthened, has made a short trial trip preparatory to a voyage to India.

W. N. U. 1858

## Stresses Empire's Greatness

Hon. R. B. Bennett Addresses Brilliant Gathering in London.

London, England.—With a brilliant gathering in attendance the delegates to the Imperial Conference were entertained at the Guildhall by the Royal Empire Society and other Imperial bodies.

"In the diversity of the peoples of our Empire, their talents and their resources, lies the real secret of the Empire's greatness," declared Hon. R. B. Bennett, prime minister of Canada, in his address.

The speech of the Canadian prime minister was greeted several times by cheers.

"Before us," said Mr. Bennett, "lies the task of Empire consolidation and with that task we meet in the heart of this great city, where trade, commerce, finance, and other great affairs engage the attention, to think of our Empire as an economic unit."

Mr. Bennett stressed the fact that he declared the nations of the Empire were not yet bankrupt in statesmanship. Men and women occupying a quarter of the land surface of the globe and comprising a quarter of its population, were still capable, by guidance and leadership, of achieving in the future what they had not already achieved, namely, the economic solidarity of the Empire which was as capable of achievement as the development of their constitutional liberties had been.

H.R.H. Prince Arthur of Connaught, former governor-general of South Africa, presided at the banquet.

## Canada's Fire Loss Heavy

Total Of \$47,000,000 Shown In Report For Last Year

Ottawa, Ont.—The fact that Canada's fire loss last year—\$47,000,000—represented almost two and one-half times the amount the Dominion Government set aside to relieve unemployment, was called up by Premier John Bracken of Manitoba, to impress on delegates to the Dominion Fire Prevention Association convention the need for greater effort.

Prime Minister R. B. Bennett was named honorary member. W. H. Shapley, Toronto, is the new president.

Among the many resolutions given approval was one recommending that institutions receiving financial assistance from federal, provincial or municipal authorities be compelled to provide adequate fire safeguards.

## Hope Is Fulfilled

First C.P.R. Train Reaches Historic Town Of Battledore

Battledore, Sask.—Another page in the history of Battledore was written when the first Canadian Pacific railway train pulled into the depot at 12:30 on the afternoon of Sept. 30.

To the citizens who crowded the station platform, it was a fulfilment of a long cherished hope, which had its birth in 1875, when the first locomotive was made which was to carry the steel from Winnipeg, Fort Livingstone, Battledore, through the Yellow Head Pass to New Westminster.

In 1881 it was decided that the route should be diverted to the south of the province, and for nearly half a century citizens of this historic town have labored for the achievement marked recently.

## Have Extensive Program

Railways To Proceed With Construction And Improvement Work

Ottawa, Ont.—Official announcement has been made by Senator Robertson, Minister of Labor, that the Canadian National and Canadian Pacific railways would proceed immediately with a \$21,000,000 construction and improvement work. Employment for 10,500 men would thereby be provided for a year, and 2,000 teams of horses would be given work for a considerable part of the time, especially for grading purposes. The employment of teams will help the farmers in many districts.

### To Teach Native

Leninograd, Russia.—Geologists, pedagogues and other scientists have gone to northernmost Siberia where 5,000 nomads live in one of the remotest corners of the world. They expect to teach the natives how to fish better, to start reindeer farms, a chamois tannery, meat cannery and a plant to make iodine from seaweed.

### Order-In-Council Grants Loan

Winnipeg, Man.—Order-in-council granting a loan of \$50,000 to the Manitoba Cattle Loan Association was passed by Manitoba's cabinet council. The association received the money at five per cent. and will charge its members seven per cent. for advances secured by lien notes on cattle purchased.

## GOV'T PROGRAM ENLARGED FOR RELIEF PURPOSES

Ottawa, Ont.—Details of the Federal Government's campaign to relieve unemployment in Canada were outlined recently by Senator Gleason Robertson, Minister of Labor. Between \$80,000,000 and \$90,000,000 will be "put to work" to better distress conditions and provide work for Canadians, he said. This included the \$20,000,000 supplied by parliament at the last session, the remainder being contributions from the provinces and the municipalities, and the \$21,000,000 program of construction and improvement work to be undertaken by the Canadian National and the Canadian Pacific railways.

The Federal Government's scheme was not limited to setting aside money for construction in co-operation with the provinces and municipalities. The Minister of Labor declared. A sum of \$4,000,000 would be set aside for "direct relief." The grade separation fund of the board railway commissioners would be augmented by a total of \$1,000,000 for the benefit of any subway work undertaken. The government would contribute on a 50-50 basis with the provinces in building a Trans-Canada highway from Sydney to Vancouver, and was prepared to pay 40 per cent. of the cost of general provincial highway work this winter.

There will be other angles to the government's relief program, Senator Robertson emphasized. Tariff changes made at the last session would afford immense stimulus to Canadian industry, he believed, and would result in the creation of more jobs. Restrictions had been placed on immigration for the benefit of Canadian labor. It was the minister's belief that the expenditure of over \$80,000,000 to \$90,000,000 throughout Canada in relief work by one kind or another, would reach every type of laborer, clerk or artisan.

The program of construction and improvements to be undertaken by the two large railroad companies, which has been formally approved by the cabinet, would result in the employment of 10,500 men for a year, Senator Robertson said. In addition, 2,000 teams of horses would be needed for grading purposes and this would be of benefit to great numbers of farmers. The whole program, he stated, called for the expenditure of \$21,000,000 with work to start immediately. Orders would be placed at once for rails, Nova Scotia coal and other necessary supplies. He said these orders were not yearly given at this time of the year, it would be necessary for the railroads to raise the money. Senator Robertson explained. Because of this, the government had decided to set aside \$1,500,000 out of the \$20,000,000 fund to guarantee interest and carrying charges to the railroads.

### Found Water Too Cold

Dover, England.—Miss Mercedes Glick, British woman swimmer, failed in a new attempt to swim the English Channel. Entering the water she stayed in only about four hours, abandoned her efforts because of the intense cold.

### ROBERT BUCK, TO ATTEMPT TO LOWER RECORD

Robert Buck, 16-year-old Elizabeth, N.J., lad who made his first flight eight months ago, will take off soon in his Picaun biplane in an attempt to lower the junior coast-to-coast flight record. He is a friend of Eddie Schneider, 18, present holder of the transcontinental mark.

## MINISTER OF AGRICULTURE

Hon. Robert Weir, Minister of Agriculture in the Federal Cabinet.

## Staff Reduced When Resources Handed Over

Accounts Can Be Handled By Smaller Number Of Clerks

Edmonton, Alberta.—No ceremony of any kind marked the formal transfer of Alberta's natural resources. Twenty-eight officials, clerks and stenographers in the Dominion Lands office here, found themselves out of employment, as transfer of the resources was made.

Regina, Sask.—Effective reduction of staff to permit financial savings by the administration of the natural resources is forecast by Premier J. T. A. Anderson in a statement issued as the provincial government took over the natural resources of Saskatchewan.

The transfer of the natural resources involves the transfer of about 20,000 accounts for grazing leases, mining claims, timber permits and contracts, land sales and contracts and school land contracts.

## Won Citizenship After Long Court Battle

But Woman Refused To Take Usual U.S. Oath For Naturalization

Lima, O.—Mrs. Carl Landis, Philadelphia, who refused to take oath to kill in defense of the United States, is now a citizen after a court battle lasting a year and a half.

She took the oath of allegiance, still reserving her opposition to bearing arms; she would serve as a nurse and shed her blood if necessary in time of war.

Common Pleas Judge A. M. Rogers admitted the reservation and granted citizenship over the protest of the assistant supervisor of naturalization.

Mrs. Landis came from Alsace-Lorraine in 1910, and was married since she began her fight for citizenship.

### Eleven Burned In Explosion

Veleja, Guanajuato, Mexico.—Eleven persons were badly burned as 5,000 skyrocket exploded in San Miguel cathedral during the celebration of the San Miguel Saint's Day. The fireworks, which had been stored in the church for the celebration, were ignited by a skyrocket which exploded.

## Maritime Ports Are Important To Canada

Only Avenues Open On Our Atlantic Coast At Certain Seasons

Halifax, N.S.—Emphasizing the important position the ports of the Maritime provinces hold in relation to the Dominion largely, Sir Henry Thornton, president of the Canadian National Railways, reminded his hearers at a luncheon given in his honor here, that at certain seasons of the year the harbors of the Maritime provinces are the only avenues of ingress and egress on the Canadian Atlantic coast.

To contemplate any separation of the Maritimes from the rest of Canada would be to condemn the Dominion to economic suicide," he added. "The position of the Maritimes economically, he added, was the best in the Dominion today. He pledged the fullest co-operation and support of the C.N.R. development of the port and province.

## Making Inspection Trip

Hon. R. J. Manion To Look Over Bay Railway And Terminals

Ottawa, Ont.—On his first inspection trip, Hon. R. J. Manion, Minister of Railways and Canals, departed from the capital to make a personal survey of the Hudson Bay Railway and its terminals at Churchill. Dr. Manion will be absent from Ottawa for a fortnight.

Accompanying Mr. Manion were his deputy, D. I. Smart, Col. A. E. Dugue, chief engineer of the department and Charles Hadlow, assistant high commissioner for Great Britain.

## ARE PLEDGED TO THE CAUSE OF EMPIRE TRADE

London, England.—The self-governing nations of the British Commonwealth pledged themselves to the cause of Empire trade. Throughout the speeches which marked the opening proceedings of the Imperial Conference the ever-recurring note was the desire to co-operate, to meet a common problem with common action.

"I should like to make this conference another turning point in the wonderful history of our people," exclaimed Prime Minister Ramsay MacDonald in a radio broadcast. "Our weakness is continued, 'in our psychology far more than in our skill, our material or our resources. It is a renewal of will that we need.'"

"What we have to consider," said the British Prime Minister, in opening the conference "is, I would suggest, what practical means we can devise for helping one another, and thereby helping us all, always remembering the different world contacts and internal industrial circumstances to which we have to accommodate ourselves."

The conference, for the first time, met in the great Locarno room of the Foreign Office.

"At this table," said Mr. Ramsay MacDonald, "are the shades of many great men and of many great events which are enshrined in a history common to us all. They do not receive from all of us the same welcome or the same homage. But there are, dignified by time, their aspects and their results smoothed and mellowed by the passing of the years and by the progression of the pageantry of history which is now our inheritance for good or for ill."

"We are still in the flesh, with fate or destiny still unwritten regarding we who have to live and plan for the future. We face a world still unsettled; beyond us is a prospect of intangible fears, set purposes, unhappy suspicions, firm convictions, numbing experiences and yet defiant idealism, and it is our lot to try and find a sure way amidst the confusions—a way which we will all sit here after us who gladly pursue to the goals which are to us but promises. If it be our good fortune to find that way, it is only because we have confidence in each other, because we are inspired in all our deliberations by the spirit of free association, and guided by a will to co-operate not only in settling our own difficulties but in giving an example of autonomy within unity to the rest of the world."

And the sentiments voiced by Mr. Ramsay MacDonald were echoed in the subsequent speeches of the Dominion prime ministers.

"My colleagues and I represent the people of Canada," Mr. Bennett declared. "We come to this conference not only with a message of affection and goodwill, but in the strong belief that, by the concerted action of the whole, we can advance the interests of all sections of the Empire."

## PROSPECTS FOR GREATER TRADE WITH ANTIPODES

London, England.—The Imperial Conference of the British nations has got down to work and the first business was concerned with constitutional questions, which arose from the Balfour report of the 1926 Imperial Conference dealing with equality of status as between Dominions and the mother country.

In the background of the constitutional discussion was the speech made by Hon. Patrick McGilligan, Irish minister of external affairs. "For us," said Mr. McGilligan, "the recognition of our position as a free sovereign state comes before all other considerations."

But it was not in the council room alone that progress was made. Canada and Australia, represented by Hon. H. H. Stevens, Canadian Minister of Trade and Commerce, and by Prime Minister James Scullin of Australia, and Hon. P. L. Maloney, Australian Minister of Markets, respectively, opened conversations with the greater development of mutual trade their goal.

It was found that both countries can buy from each other many things they now buy outside the Empire. Australia had dried fruits and oranges, pineapples and wool to offer Canada, which at present buys pineapples from the Hawaiian Islands, and wool on the New York market. And Australia, it was pointed out, buys from New Zealand a number of products she could just as well take from Canada.

Hon. Mr. Stevens also had some informal conversations with the New Zealand representatives in regard to trade with New Zealand, with particular attention being paid to the higher Canadian tariff on butter, which is to be eight cents instead of four cents a pound.

## Scholarships Awarded To Canadian Nurses

Will Take Post Graduate Course In Public Health Nursing

Ottawa, Ont.—Following a policy in the organization since 1921, during which time 144 scholarships have been granted, the Victorian Order of Nurses for Canada has again given scholarships to enable well qualified nurses to pursue graduate course in public health nursing at Canadian universities.

This year's awards have been made to Miss Hazel Latimer and Miss Edith Stevenson, both of Ottawa; Miss Elizabeth Edwards, Kingston, Ont.; Miss Mary Henderson, Niagara Falls, Ont.; Miss Margaret Ferguson and Miss Jean Watt, both of London, Ont.; Miss Annie R. Smith, of Calgary, and Miss Jacqueline Noel of Montreal.

## Pays Extreme Penalty

Gordon Northcott Hanged For Chicken Ranch Murders

San Quentin, Cal.—Gordon Stewart Northcott, 28, chicken rancher of Wineville, Calif., was hanged here for the murder of three young boys after he had left a written confession of his crime and faked a suicide attempt.

Northcott was led blindfolded to the gallows and collapsed as he stumbled up the 13 steps to the scaffold platform. Guards held him until the trap was sprung at 10:03 a.m. just as Rev. Larry Newgent, Los Angeles evangelist, was intoning verses of consolation from the 14th chapter of St. John.

## Develop Wheat Markets

Federal Government Appropriates Sub Of Money For Practical Demonstrations

Ottawa, Ont.—In an effort to develop the markets for Canadian wheat, the Dominion Government has appropriated a sum of money to be used in practical demonstrations of the use of Canadian flour for baking purposes.

These demonstrations will take place first at different points in the United Kingdom, subsequently expanded to European countries.

### Pilot's Death "Misadventure"

Fort William, Ont.—"Misadventure while teaching advanced flying" was given as the reason by a coroner's jury, for the death of Capt. James A. Dickie, Bishop's Field Flying Club instructor, who was killed when his plane crashed near here, September 8. Miss Marian Swain, passenger in Dickie's Moth plane when it met disaster, was unable to testify. Suffering from lapse of memory, she said she was unable to remember anything of the fatal flight.

## May Challenge For America Cup

Plan Is Urged For Canadian Yacht To Make the Attempt

Entry of a Canadian yacht, particularly one from the Nova Scotia yacht squadron, located at Halifax, as a challenge for America's Cup, is being mooted, now that the "Shamrock V" has been so decisively defeated by the "Enterprise."

Under the present rules of the race, only clubs which have their courses upon the sea, or upon an arm of the sea, may enter the race, and, in any case, the challenger must proceed to the scene of the races under her own sail. This would seem, according to sportsmen, to point to Halifax as the logical location from which a contender for the cup should come. It is the belief of local yachtsmen that financial backing for such an enterprise would not be found wanting.

Should an attempt for America's Cup be made, it would be only the third time in the long history of the races that a Canadian yacht entered. The first attempt was made by the "Contender" which was towed through the Erie Canal, and her draught was too great for the artificial waterway. The result was that, as her mule-teams dragged her through the canal, she was towed to one side, and made rather a ludicrous picture. As the outcome of this the ruling that only ocean-going yachts might compete was brought down, thus eliminating all clubs on the Great Lakes from the series.

In view of the "Shamrock's" defeat, a strong effort to have a Halifax yacht represent Canada in another race for the cup will be made, according to yachtsmen.

## Soy Beans Are Valuable

Holds One Of Foremost Places As Forage Crop

The commercial demand for soy bean oil or meal from time to time will fix the value of the various varieties suited to cultivation in Canada is the observation of the chemist of the Dominion Department of Agriculture. The correlation between "oil" or fat content and protein he finds is remarkably consistent; the varieties that are high in "fat" being relatively lower in "protein," and vice versa. This becomes a matter of importance in view of the fact that there are now some twenty-four varieties of soy bean which have been proven suitable for cultivation as a commercial crop in Canada. The commercial value of the soy bean arises from the oil obtained by expression, and the use of the residue of the bean, which is rich in protein, in the form of meal or cake as a livestock food. Soy bean oil is used in fish canning, paint and soap manufacture; and the soy bean is also an important constituent in some of the popular patent foods now appearing on the market. In addition, as a legume and forage crop it ranks among the best.

## Rainbow Trout

Over 201,000 Fry Collected At Waterton Lakes Park

Over 201,000 rainbow trout eggs were collected in Cameron Lake, Waterton Lakes Park, Alberta, this summer by the fish culture division of the Department of Fisheries, or six times as large a collection as was made in 1929, when rainbow eggs were first collected in that district. The eggs were placed in the Waterton hatchery. All told, 329 fish were stripped between June 5th and July 2nd, and yielded a total of 201,006 eggs.

## C.P.E. Cattle Win

Western Canadian cattle almost swept the boards in 16 classes at the Washington State Fair, just concluded at Yakima, Wash., when the Holstein show herd owned by the Canadian Pacific supply farm at Strathmore, Alberta, won 14 first prizes and nine seconds, and also carried off senior, junior and grand championships in both male and female classes.

"What did you think of my medicine?"  
"Excellent! I am no worse."  
Montique, Charleroi.

W. N. U. 1888.

## Tourist Business Brings Revenue

Fourth Largest Industry Has Doubled Within Five Years

While the tourist business this season may not equal that of 1929, this fourth largest industry has doubled in five years' time, according to C. W. Johnston, Montreal, general passenger traffic manager for the Canadian National Railways. In 1929, Mr. Johnston pointed out, this business provided a total revenue of about \$300,000,000, most of which came from American visitors who left in this country 40 per cent. of the vast sum they expended in pleasure and business travel outside of the United States.

"As a result of the economical situation across the line, a number of those who previously travelled extensively in Canada did not return this year, but, on the other hand, many Americans visited here for the first time, and, generally speaking, the tourist trade has been more than fair, to say the least," said Mr. Johnston.

"As to the transportation situation, which today the airway and highway travel is a factor, too, it may be pointed out that the railways have more than ever established themselves as the main supporters of the whole economical structure. Their contribution to the transportation services rendered the public has remained the major one. Their thousands of employees, through betterment of their wages, have continued to improve their social and economic standing in the community. Disregarding changes of a temporary nature and limited duration, the Canadian railways' financial performance and outlook has improved consistently."

## Livestock Men's Turn

With Low Prices For Grain, Stock Raising Should Prove Profitable

A strong trend toward livestock has set in. While agricultural prices in all the major lines have dropped since last year, the relative price level for livestock is most favorable compared with the level of feeding stuffs. The next few years seem to promise to be the livestock men's turn.

Notwithstanding the effect of dry weather conditions in some parts of the Dominion, Canadian feeding stuffs are in more than average volume. The hay crops everywhere were satisfactory and in some places exceptionally good. There is an unusually heavy carryover of barley and to a less extent of oats and the low price ruling for all feeding stuffs is stimulating livestock production. All the indications are that livestock is at the beginning of an upward swing. If production is well planned now, it should do much to offset the loss to farmers through the low prices of grains, though good productive planning needs a "long view" of conditions, not of prices for stock or feed during a particular season only.

## Great Bear Lake Scenery

The eastern part of Great Bear Lake in the Mackenzie district of the North West Territories, Canada, is a magnificent system of fjords and land-locked channels, not unlike the west coast of Norway.

Children of the village school in Kingston, Magna, England, sing in seven languages—English, German, Italian, French, Flemish, Greek and Hebrew.

Captain Friedrich Christensen, who will command the huge German air liner DO-X, when she starts her trans-Atlantic flight to America in the near future.

## Suitable For Fruit Growing

Peaches Successfully Produced On Farm At Congress, Saskatchewan

Hon. W. C. Buckle, Saskatchewan Minister of Agriculture, has had the pleasure of tasting a number of Saskatchewan-grown peaches. Though he didn't get around to taking the odd bits of them, there were also Saskatchewan watermelons and muskmelons. All were grown on Vinecroft Farm at Congress. The farm is owned by R. V. Sulla, but the fruits were raised by Thomas Lipson, Price, four years out from Ireland.

According to Mr. Price, he planned to send Mr. Buckle a sample of nectarines, peaches, 25-pound radishes, 1,200-pod beans to one plant and a new climbing cucumber he has developed. His peaches, said Mr. Price, he guaranteed to develop from seed in 80 days. He was positive that Saskatchewan soil could produce such fruits in other places than Congress also.

Mr. Price said he has been laboring in the interests of the Department of Agriculture of Saskatchewan since his arrival. He plans to return to his home in Belfast, Ireland, in two months time.

## Making Milk Attractive

Children Likely To Take It Readily If It Is Fixed Up

Markets provide a profusion of vintages, and food experts daily point out ways of preparing food attractively, but this is little comfort to the child whose bill of fare is more or less restricted to milk and spinach.

Most children abhor spinach, and a great many of them stubbornly refuse to drink milk. The benefits of milk when forced on a sobbing, reluctant child are questionable, to say the least, and an enterprising mother will dress it up, flavor it and even make up fancy names for it in an effort to make it attractive to her children. There is practically nothing she can do toward making spinach appealing.

With several cereal beverages on the market today which are suited to the needs and taste of children, the resourceful mother will find it easy to prepare milk so that the children will actually enjoy it. These cereal beverages, made with plenty of milk, sweetened to taste and served hot, are healthful.

## Didn't Register With Her

The buttonless husband contemplated his jacket which he couldn't do up. It occurred to him that he might get something done by a little appropriate sarcasm.

So, as he was just about to go shopping with his wife, he remarked: "Oh, by the way, remind me to get some needles and thread when we're out, dear."

His wife gave a dazzling smile. "You silly, extravagant boy," she cooed, "you can always borrow mine, you know."

## The Magnetic Pole

It is interesting to note that the location of the north magnetic pole by Major Burwash's Canadian expedition near Cape Adelaide, on Boothia Peninsula, is approximately where Amundsen placed it from observations which he made between 1903 and 1906; viz., 71 degrees north latitude, 96 degrees west longitude.—Boston Transcript.

Manufacture of typewriters is being started in Poland.

## Mammoth Farms

Dr. Allen Of Saskatchewan University Denies Report That Wheat Factories Were Predicted

"We have never stated that we believed that 100,000 wheat factories would replace the present family farms," said Dr. William Allen of the farm management department of the University of Saskatchewan. Statements have appeared in the press that the group of 30 agricultural authorities, economists, and engineers, who recently toured Montana, North Dakota and southwestern Saskatchewan, had reported in favor of the mammoth farms as likely to supplant the family size of farm.

The group who made the tour has made no report as a group as they consisted of a number of individuals making their own investigations. Neither Dr. Allen nor Professor E. A. Hardy, the members of the party from Saskatoon, were convinced that the mammoth commercialized farm would supplant the family farm under Saskatchewan conditions.

Lower cost of production per bushel of wheat was found on many of the Saskatchewan family size farms than on the mammoth farms visited in Montana. "The Saskatchewan and Montana conditions are entirely different," says Dr. Allen.

This does not, however, mean that many farms are not too small to be economic units, he adds. The changes in farm machinery have increased the size of the unit that can be best worked by a family.

## The Creative Faculty

What Young People Most Need Is Familiarity With Their Native Tongue

There is something about the creative impulse, indeed, that seems to require a set of harness on it before it can accomplish anything: good writing, good music, good painting that have gone before, and then carry on from there. In the case of children, emancipating them from the usual discipline would seem to be especially bad, as few of them will ever be professional writers, and what they most need is familiarity with their language as it is actually used, so that in later years they will at least be literate and able to earn their living. When a girl is eighteen and loses her first job because she cannot spell it will not be very consoling to her to know that at the age of eight she babbling out a sweet little poem on her doggy and her kitty.

—New York World.

## Prairie and Yukon Fisheries

The product of the fisheries of the Prairie Provinces and Yukon Territories in 1929 was valued at \$4,070,005, compared with \$3,580,562 in 1928. These figures represent the value of the fish as marketed; Manitoba in 1929 contributing \$2,745,305, or 67 per cent; Alberta, \$723,214, or 18 per cent; Saskatchewan, \$573,871, or 14 per cent; and the Yukon Territory, \$24,805, or 1 per cent. Whitefish was the chief catch, representing 34½ per cent. of the total value of fisheries production.

## Died Penitless

Harry McNeil, member of two Antarctic expeditions, with Captain R. F. Scott and Lieutenant Sir Ernest H. Shackleton, died recently at Wellington, New Zealand, penniless at the age of 84.

## Keeping Tab On Salmon

Impressive March Past Of Over 8,000 Sockeye Is Witnessed

An impressive march past of over 8,000 sockeye salmon was seen recently at Stamp River Falls, B.C. The fish took from June 11th to July 20th to pass the falls by aid of the railway constructed by the Canadian Government Department of Fisheries. A count of the fish was made by the Government Fisheries Guardian at the falls during ten hours of each day in the six week period. As compared with the number of sockeye using the railway in the corresponding period of 1929, there was a very large increase this year. In 1929 the total was 3,515 as against 9,061 this year.

The railway overcomes a height of some forty feet of turbulent, crashing water and is a means of ascent for many salmon which might otherwise not be able to battle their way to the spawning areas. This year a very large number of sockeye have been able to make their way over the natural falls.

The coastal and inland waters of British Columbia are among the most productive salmon fisheries in the world, and the quality of the salmon carried there is unsurpassed.

## Noted British Persons

Have Actual Doubles

At Least Three Who Closely Resemble Lloyd George

Many of London's great, and near-great, have doubles. George Bernard Shaw has a double in a pavement artist who usually has two pictures, one of himself and the other of the famous writer, at his stand with the chalked inscription: "Which is which?"

A bus driver looks enough like Home Secretary John R. Clynes to be a twin. Lord Birkenhead's double is a well-known professional man and an underground railway official is the image of Arnold Bennett. Lloyd George has at least three doubles, while recently a man rushed up to a prominent first-nighter whom he mistook for H. G. Wells, to congratulate him on his latest book.

## Rust Dusting Pays

Rust Research Experts Tell How Rust Can Be Controlled

A decided increase in yield in favour of the dusted crops is reported by rust research experts of the Federal Department of Agriculture. Experiments show that the aeroplane is well suited to the dusting of large areas. Not only can rust be controlled by dusting but even in the absence of severe rust infection the beneficial effects of dusting are evident. Sulphur dust is found particularly effective in the control of rust and leaf diseases. In practically every case there was a decided increase in yield in the dusted crop.

## Saskatchewan Pool Elevators

Saskatchewan Pool Elevators Limited, this year are operating 1,034 elevators, out of 1,090 owned by the company; 14 being closed and 12 under re-construction. The pool elevator system came into existence in Saskatchewan for the crop year 1926-26, when the company handled 11,296 per cent. of the pool grain of the province and this had risen by the year 1928-29 to 94.1 per cent.

Postal savings in Japan are \$100,000,000 greater than a year ago.

## Gulf Stream Benefits Iceland

Warm Water Creates Climate Similar To Southern Countries

Iceland's name naturally suggests to the prospective visitor that he will find a frozen waste. When his map shows this island to lie across the very threshold of the Arctic Ocean, hard by the glacial coast of Greenland, and 800 miles further north than bleak Labrador, he is almost prepared to come upon a land of polar bears and of fur-clad folk living in snow igloos. But Iceland is labeled both by nomenclature and maps, according to the National Geographical Society.

"On many charts the most important physical fact in Iceland's life does not appear," a recent bulletin of the society says. "Up from the south flows the warm Gulf Stream to enfold the island and work the magic of whisking it out of nearly a thousand miles toward the Equator; so that its climate is not that of the polar regions, but of Southern Canada or Northern United States."

"On Iceland's coasts are thriving towns with buildings of stone, gabled roofs and church steeples, busy streets and electric lights. In the streets are men and women garbed much as are the inhabitants of Copenhagen and Glasgow, Ottawa and Minneapolis. One's eyes tell him that here is the same civilization that Europe and America know."

"The immaterial factors proclaim the truth, still more unmistakably than do material things. Here, in this far northern land, a worthy national literature and stable national institutions were developed when much of Europe was foundering in the Dark Ages. Here the lamp of a Nordic Renaissance burned and lighted its own region before the beacon of the Latin Renaissance was held aloft to light the way for the world. This northern light has never faded. Today the literacy rate is higher in Iceland than in many countries of Europe."

"The people of Iceland have a great literature of their own in the old sagas, and many of their modern poets are especially gifted. Their folk songs are popular throughout the country and rank with the best of any nation."

## Holstein Record

Moose Jaw Herd Makes Number Of Records In R.O.P. Tests

E. H. Thompson of Moose Jaw, a leading breeder of Holstein cattle in Western Canada, and a director of the Holstein-Friesian Association, has just made a new record in a number of records with a group of five cows and heifers, members of his best herd, which make an excellent showing. These five individuals, qualifying in the R.O.P., all but one in the 365-day division, gave a total production amounting to 73,032 pounds of milk, containing 3,256 pounds of butter, an average per animal of 14,606 pounds of milk containing 651 pounds of butter.

## Best Guide To Conduct

Nothing Is As Satisfactory As Following The Golden Rule

The "Golden Rule" is the very best guide to human conduct in all relations in life. It is the best rule in business. It gets better results than crass selfishness. It establishes business on a surer foundation. It gives greater satisfaction to the man in business than a sordid course could. The "Golden Rule" is the best in the profession. It is the best in the home. It is the best in society. In truth, in every relation and aspect of life the Golden Rule is without equal or superior.

## Chinese Library At McGill

Works in the East Chinese Library at McGill University have reached the 110,000 mark, according to a report by the curator, who points out that a Chinese volume commonly has three to four times the amount of written matter contained in an English book of the same kind. A Chinese character represents, in some instances a whole English sentence.

"We shall have to perform a little operation."  
"A large one. Remember the patient is a millionaire."—Buen Humor, Madrid.

## DORNIER SEAPLANE DO-X PREPARING FOR GREAT DASH

Hovering alternately over land and water with occasional swoops down upon both, the giant Dornier seaplane DO-X, flying shark of sea and air, goes about the business of preparing for its epochal dash across the Atlantic to the new world. Luxury of a kind never yet approached in trans-Atlantic air travel is assured the men and one woman who are scheduled to blaze the trail in the magnificently-fitted air-water liner. Dr. Claude Dornier, designer and builder of the DO-X, and Captain Frederick Christianensen, its commander, have expressed themselves as completely satisfied with the preliminary tests. In addition to Commander Christianensen and Maurice Dornier, the ship is expected to have two engineers, electrician, steward, five mechanicians, wireless operator and two passenger correspondents. Above, view of DO-X flying over water, at about 125 miles an hour, gives one an idea how it will appear upon its flight to America.

## Don't Gamble With Health

We all know health demands absolute inner cleanliness, but what we often don't realize is the risk we take when we use harsh, gripping purgatives that create a strained, unnatural condition.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

"A daily dash of ENO'S 'Fruit Salt' in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear."

## THE DUSTY HIGHWAY

BY CHRISTIE WHITING  
PARMENTER  
Copyright 1929

CHAPTER I—Continued

Bore her—Nick, who had never said a dull thing in his life! And he really meant it. She could tell by the look in his eyes. He wasn't joking. It made her smile, even as she answered shakily, because she couldn't quite control her voice: "I always knew, Nick, that you possessed a streak of chivalry; but to have it carry you to this extent—"

"Chivalry be damned!" he interrupted. "That's Tommyroy, my dear, and you know it. Come on, Gay. Be a sport. Put on your old grey bonnet or whatever headgear you prefer—the few necessities in a handkerchief, and—"

He closed his eyes, folded his arms, and softly sang: "Oh, that we two were Maying."

Nick's voice, sweet and true as a bird's, always stirred the girl. She turned now and laid her hand on his. "You're a good friend, Nick — the best I ever had, — even shall have. I'll never forget what you've done for me just now. Somehow, it makes everything easier; but I refuse to spoil your freedom, dear old boy."

Nick squeezed her hand, he proclaimed loftily, "I stood in the orchard bequeathed me by my late uncle, and announced to all who cared to hear, that I could conquer the world. And now you imply that I can't conquer a slip of a girl in a pink gown. I refuse to be vanquished! Something tells me that you'd be able to put up with me."

Without concert, I think I can promise to prove a more thrilling housemate than Miss Sadie. Run along now, and pack your bag. I'll allow you a suitcase as far as State Lane. In forty minutes—no, thirty, I'll be at the back gate in uncle's rusty silver. We'll leave it behind us after the parson has done his worst. Be gone, girl. The hour waxes late."

"Are you really — proposing to me?"

Gay's cheeks burned, and the young man answered: "I am. Gee! I've always supposed it would be a fearful undertaking, and it comes as easy! For two cents I'd kiss you, if I wasn't afraid Selma was at the window."

To his surprise Gay stifled a sob. "I—can't, Nick."

"Why not?"

"It wouldn't be fair."

"Not to you, perhaps," he agreed.

## READ OF A CASE LIKE HER OWN

Decided to take Lydia E. Pinkham's Vegetable Compound

Moncton, New Brunswick—"Before my last baby was born I was very weak, nervous and distressed. I saw an advertisement in the paper about a woman who had been like me so I bought a bottle of Lydia E. Pinkham's Vegetable Compound. I took three bottles and it carried me safely through that critical time. I have three children to care for and I feel well and strong. I have told two other women about your medicine."

—Mrs. GUS ABERNATHY, 92 Albert Street, Moncton, New Brunswick.

W. N. U. 1658

she looked down on the town that had sheltered her all her life. It had sometimes seemed a prosaic town. Gay, now, in comparison with a bewildering and unexpected future, it looked dreary and friendly. Almost, she was sad to leave it. The grass of the common was so gaily green, topped by tender, uncaring leaves of elm trees that had stood there for a century. Blossoming orchards sloped to the quiet river; and everywhere was the sweet scent of spring.

Gay's hand tightened, and Nick covered it with his own.

"Homesick — already?" he questioned gently.

Gay shook her head as they began the descent of the long hill.

"No, Nick, I wasn't homesick, exactly; but it looked so natural; and what we're doing is so amazing. Why, even an hour ago I didn't dream—"

She stopped, as if it were difficult to express her thought; and Nick continued: "That before the sun was non-high you'd be starting on your honeymoon? Well, Gay, we're both in the same boat. I don't wonder you feel a little dazed. I'm dazed myself; but you're not to feel lonesome. I shall let you tell me what, young lady, we're lucky to live within forty miles of a state where we can get a license and be married all in an hour!"

"And how I've scorned the people who have done it!"

Gay flushed hotly at the memory; but Nick only smiled as he admitted: "Same here, old girl. We never knew when she should plump on our foot, do we? But there's one thing, we're lucky to live within forty miles of a state where we can get a license and be married all in an hour!"

He spoke so seriously that for a moment Gay forgot the look he had given her when they started. She wondered, with a little chill at her heart, if Nick would rather shed have come to him as well, as most girls would have come. Was there, perhaps, something in him that revolted at what might seem a lack of daintiness on her part. He didn't know what that red bandanna held in his hand.

"Nick," she began, as if she was the least bit frightened, "did — did you think it wasn't nice of me to come this way?"

He turned to her surprise written on his face. "Nick? — why —" (he put his foot on the brake bringing the car almost to a standstill), "why shouldn't it be nice? I think it is really of you, Gay. Do you know, after I left you, I wondered just how we'd manage. I'm not such an idiot as to think you could travel as light as I can; but a suitcase—"

"Well, I'll say, Gay, that when I saw you, after I left you, I wondered just how we'd manage. I'm not such an idiot as to think you could travel as light as I can; but a suitcase—"

## True dyes are easiest to use

Says Dr. Sappington  
Dresses, drapes or lingerie look new when they're dyed with Diamond Dyes. No spotting or streaking; never a trace of that faded look. Just rich, even, bright colors that hold amazingly through wear and washing.

Diamond Dyes are the highest quality dyes you can buy because they're so rich in pure anilines, that's what makes them so easy to use. That's what they've been famous for 60 years. 15 cent packages—all drug stores.

## Diamond Dyes

Highest Quality for 50 Years

## Automobiles Get Credit

Have Lessened Cases Of Lockjaw

In spite of the enormous number of cuts, scratches and bruises for which automobiles are responsible each year, the automobile must be credited, believes Dr. C. O. Sappington of the National Society Council, with a great decrease in cases of lockjaw in the United States in the past ten years.

Not that automobiles or automobile have any direct effect on the lockjaw germ. What has happened, Dr. Sappington explains in a recent issue of the council's industrial bulletin, the "Safe Worker," is that automobiles have displaced millions of horses, especially in cities. The lockjaw germ, he continues, is a normal inhabitant of the digestive system of the horse.

In the old days when horses were used to pull the living lockjaw germs were scattered by billions everywhere in soil and dust.

Any chance injury, such as stepping on a rusty nail, or a cut with a wire, or even a scratched hand or knee caused by a fall, was likely to become infected with these lockjaw germs, which then multiplied in the blood and brought on, after a few days, the dreaded spasms of the jaws and other muscles, which gave the disease its name.

The lockjaw germs, Dr. Sappington recalls, cannot enter the body through unbroken skin. Some kind of scratch or cut is necessary.

Nowadays, with fewer horses to scatter the germs, such accidental abrasions of the skin are less likely to become infected with lockjaw germs, although it still is a good plan, Dr. Sappington agrees, to have all such cuts cleaned and disinfected by an expert physician or nurse.

After a dose of lockjaw serum if the physician so advises.

## Recipes For This Week

(By Betty Barclay)

### MOCHA WALNUT CAKE

1 1/2 cups sifted cake flour.  
2 1/2 teaspoons baking powder.  
1/2 cup butter or other shortening.  
1 cup sugar.  
1/2 cup strong decaffeinated coffee infusion.

3 egg whites, stiffly beaten.  
Sift flour once, measure, add baking powder and sift together three times. Cream butter thoroughly, add sugar gradually, and cream together until light and fluffy. Add flour, alternately with coffee, a small amount at a time, beating after each addition until smooth. Add nuts, mixing well.

Fold in egg whites. Bake in greased pan, 8x8x2 inches, in moderate oven (350 degrees Fahrenheit), 45 minutes. Cover with mocha frosting.

### QUEEN TEA MUFFINS

1 1/2 cups special cake flour, sifted.  
4 teaspoons baking powder.  
1/2 teaspoon salt.  
4 tablespoons butter or other shortening.  
4 tablespoons sugar.  
1 egg, well beaten.

1/2 cup milk.  
Sift flour once, measure, add baking powder and salt, and sift again. Cream butter, add sugar, and cream together thoroughly. Add egg, then flour, alternately with milk, a small amount at a time. Beat after each addition until smooth. Bake in greased muffin pans in hot oven (450 degrees Fahrenheit), 20 minutes. Makes 18 small muffins.

Private Aerodrome For Prince Sandringham, the Royal residence in Norfolk, is to have a private aerodrome for the Prince of Wales and Prince George on their air visits. If the final details of the plans now under consideration receive the King's approval, a hangar large enough to accommodate four planes will be erected on the estate, fronting on the Royal golf course.

The unicorn fish wears a single horn.

Mina's Liniment has a hundred uses.

## Demonstrates Invention

Woman Has Contraption Which Will Revolutionize Marbles and Miniature Golf

Mrs. Nora Payne, of Brighton Beach, New York, gave a demonstration of her new invention—a device which she hopes will soon revolutionize the game of marbles, the game of miniature golf and the game of darning holes out of socks.

Mrs. Payne, who is 26, has a 9-year-old son who inspired the invention. The boy used to come in with holes in the knees of his stockings and while his mother sewed them up, this idea of revolutionizing things suddenly smote her.

Her invention looks like a cross between a bicycle and a gearshift lever. It has a knob at the top, attached to a rod which runs down through a cylinder. At the bottom of the cylinder is an opening and a little flipper.

The marble player simply stands on his feet, clamps the thing down over a marble gives the knob a wrench with his hand and the marble shoots out. Any self-respecting boy who owned such a contraption would not stoop to such marbles.

## If baby has COLIC

A CRY in the night. Colic! No cause for alarm if Castoria is handy. This pure vegetable preparation brings quick comfort, and causes no harm: it is the sensible thing when the baby's tongue is coated, or the stomach, or the little bowels; colic or constipation; or diarrhea. When tiny tongues are coated, or the breath is bad. Whenever there's need of gentle regulation. Children love the taste of Castoria, and its mildness makes it safe for frequent use.

And a more liberal dose of Castoria is always better for growing children than strong medicine meant only for adult use.

Fletcher's CASTORIA

## Why Kicking Horse Route Was Chosen

So Railway Could Be Built Close To Boundary Line

An interesting bit of railway history was recalled by Hon. H. B. Bruce, lieutenant-governor of British Columbia, at a dinner on board the steamship "Empress of Japan" in Vancouver. He is a civil engineer by profession, came to this country the year the first Canadian Pacific Railway train reached Vancouver, obtained a job with that company at \$1.25 per day, and from 1887 to 1897 was on its engineering staff.

"I want to tell to these some people," he said, "who are fond of casting reflections on the judgment of the company in its building of its line through the high divide of the Kicking Horse Canyon, rather than by routes perhaps easier from the engineering standpoint. The Northern Pacific and the Great Northern have already been built south of the international boundary line and very close to it. Old Jim Hill and his friends were anxious to build sidelines into British Columbia to drain one district after another into trade routes of the United States."

"So it was Sir William Van Horne's considered judgment that the Canadian Pacific must run as near to the international boundary on the Canadian side as possible. He said, 'North of the C.P.R. the country will be safe for Canada, but if we lead the Canadian Pacific to have built the railway farther north would have given the land to the south away to the people of the United States for them to develop—Toronto Mail and Empire."

For years Mother Graves' Worm Exterminator has ranked as a reliable worm preparation and it always maintains its reputation.

Landlady: "You will either pay the two months' rent you owe or go to town."

Lodger: "Thanks for the alternative. My last landlady wanted both."

The fisherman's prayer, says the St. Augustine Record is: "Lord, suffer me to catch a fish so large than even I, when talking of it afterwards, may have no need to lie."

Bus lines are being established in Portugal.

"It is said that paper can be used effectively in keeping a person warm."

"Yes, I remember a 30-day note once kept me in a sweat for a month."

of Parkland are visiting in town  
the guests of Mrs. Devins' parents  
Mr. and Mrs. F. Mossop.

Mr. and Mrs. M. Turner and  
Mrs. Marston and Mrs. Marston  
were visitors in the town and country  
on Sunday last.

Carl Becker who has been visit-  
ing here for the past two weeks,  
left on Monday for Nemican, Alta.  
where he and his father have a  
contract for the erection of a school.

The many friends of Mrs. O.  
E. Jones will be glad to see her  
around again, following an injury  
of two weeks ago when she  
stepped on a nail.

Mrs. M. Clay wishes to announce  
to her patrons that she has moved  
her beauty parlor to her residence  
at the Denvers house, opposite  
the Union Church for the winter  
months.

Mrs. M. Gilmour, better known  
to the people of Crossfield as Mary  
Young, arrived home on Wednes-  
day evening last after spending  
two years in Germany, Ireland  
and other places enroute.

A full report of the Board of  
Trade meeting and the address  
of Major Strange which is to be  
given in the U.F.A. Hall tonight  
(Thursday) will be given in next  
week's issue.

We have just received our sam-  
ple book of Personal Greeting  
Cards. There is a better selection  
of cards than in previous years,  
and the values are far greater. We  
will be pleased to have you call and  
see the samples.

The Village Council have made  
a decided improvement to the  
crossing on Osler Street, by putt-  
ing in a new walk and raising it  
some nine inches, making it possi-  
ble to cross the street without get-  
ting in the mud.

**Coming Events**

Items under this heading will be charged  
for at the rate of 10c a line for the  
first insertion and 5c a line for each sub-  
sequent insertion. Church affairs at  
half price; minimum 25c.

Justice Rebekah Lodge are  
holding a tea and sale of home  
cooking on Saturday, November  
1st. Watch for further particu-  
lars.

The C.W.L. will hold a tea and  
sale of home cooking, next door to  
Service Garage, on Saturday,  
October 11th, at three o'clock.  
Your patronage will be greatly ap-  
preciated.

The Crossfield Tennis Club will  
hold a dance in the U. F. A. Hall  
on Friday, October 24th. During  
the past year the tennis dances  
have been very popular. Keep  
the date in mind.

Mrs. Waldoock, Mrs. Gilchrist,  
Mrs. Baker and Mrs. Pogue were  
joint hostesses to a miscellaneous  
shower held on Friday night at  
the home of Mrs. Waldoock, com-  
plimentary to Miss Dorothy Col-  
lins, an October bride-elect. The  
guest of honor was presented with  
many useful and beautiful gifts.

Rev. and Mrs. Currie of the Ang-  
lican Church were at Home to  
their friends on Wednesday last,  
and despite inclement weather on  
that day, quite a number of the  
ladies of town and district made  
the acquaintance of Rev. and Mrs.  
Currie.

300 head of calves were brand-  
ed at the Dougan Ranch on Fri-  
day of last week. Chris Asmus-  
seu and Fred Stevens where out  
helping doing the roping, brand-  
ing, etc. These old boys have not  
forgotten how to do there  
stuff.

Editor Chronicle  
Dear Sir:

Recently, while on a holiday  
tour from Calgary to Edmonton,  
I passed through your town. I  
would like to express my apprecia-  
tion of the splendid condition  
of the roads in your village, which  
is evidence of the fact that Cross-  
field is a wide-awake place, and  
gives its roads very excellent care.  
It was a pleasure to drive through  
your main street. Any other time  
that I am passing your way, I  
shall make it a point to give  
Crossfield as much of my patron-  
age as possible.

Yours very truly,  
A. TOURIST.

**Ladies Aid Chautauqua**  
**Supper**

As there will be many subscri-  
bers to Chautauqua who will wish  
to attend both afternoon and even-  
ing concerts, the Ladies Aid of the  
Union Church are offering supper  
and hospitality to those who might  
prefer to remain in town for the  
interval between, rather than go  
home after the afternoon perfor-  
mance and return again for the  
evening one.

Several women are offering their  
homes for this purpose where guests  
will be made very welcome and  
given an opportunity to rest and  
freshen up before the evening con-  
cert.

Supper will be served, charges:  
Adults 40c. children 25c.  
Mrs. Metherall will be present  
at the afternoon performances and  
will be glad to direct the guests to  
the different homes and will also  
furnish any necessary information  
in regard same.

The Pool elevator office, where  
Happy MacMillan hangs out, is  
the main headquarters for the  
baseball fans who gather and lis-  
ten to the radio reports of the  
world's series baseball games.

It's a baseball atmosphere all  
right. Imagine a room 8x8 with  
about 25 fans inside and six or  
seven blocking the door way; the  
air blue with smoke and all talk-  
ing baseball, and you have an idea  
of the pool elevator office when  
the game is coming in.

Evert Bills is generally sitting  
on the floor with his knees up so  
as to give his neighbor a chance  
to turn around. Archie McFad-  
en, along with six other fans, is  
partly sitting on an old trunk, but  
this uncomfortable seat does not  
stop Archie from talking.

Archie is pulling for St. Louis,  
and he and Evert keep up a run-  
ning line of chatter during the  
game. Archie threatens to take  
all the money Bills had, if he had  
his wheat threshed, and so on.

When Philadelphia had won  
Monday's game and it was all  
over but the shouting,—well, let  
Archie tell it—

"St. Louis has the best team,  
and can win, but, anybody but a  
d— fool can see all they are after  
is the late receipts."

"Evert Bills, Cruickank and the  
rest of these wise boys have a lot  
to learn yet. Yep! Yep!"

Balzac Mission by the Venerable  
Archdeacon Tim.

A. D. CURRIE,  
Priest-in-charge

**On Time**  
Now that the school calls at 9  
o'clock every morning, in many a  
home both city and country, there  
is a grand and glorious scramble  
and rush to get the children off on  
time.

Some boys and girls never do  
acquire that most valuable of hab-  
its—punctuality—and they go  
through life trying to catch up and  
never getting there. Looking at  
lateness from the point of view of  
the teacher and classroom, it is one  
of the unpleasant and unpardon-  
able annoyances that take the joy  
out of the day.

Looking at it from a health  
standpoint the child with his break-  
fast bolted and his appetite unsatis-  
fied makes a poor pupil. He starts  
the day handicapped.

**FARMERS WANT ALBERTA LIVESTOCK**

Many farmers want feeding and breeding Cattle. Livestock is one of the best means by which grain can be marketed. Help to preserve this market by keeping unfinished cattle and breeding stock on Alberta farms.

**WHAT HAVE YOU FOR SALE ?**

If you have cattle for sale, send a list giving full particulars of number of breed, age, condition, etc. to—

**Livestock Branch—Alberta Department of Agriculture**  
Parliament Buildings, Edmonton

**DO YOU WISH TO BUY ?**

Those wishing to buy cattle should write to the above Branch, giving full particulars of their requirements.
